

Created by Pharmacy Owners for Pharmacy Owners as an all-in-one solution for purchasing transparency and wholesaler compliance.

When deciding what to purchase for your pharmacy, there are nearly endless decisions and data points that are in constant flux. Pharmacies are constantly playing a guess game:

- What to purchase at what time?
- What should be purchased compared to dispensing history?
- Which supplier has the best price?
- How do purchases impact your primary wholesaler compliance?
- How much time is spent attempting to login and shop each wholesaler's systems?
- What are the return policies and expiration dates?

There is so much information to attempt to analyze to ensure the profitability of your store and drug availability for your patients. More and more, the balance of cost of goods and primary wholesaler compliance is a moving target.

Pharmacy Marketplace helps stores ensure they hit the sweet spot in purchasing and compliance at the most competitive price while analyzing your dispensing history to ensure you are also purchasing at the right time.

Marketplace Membership:

Access to Better Pricing - Our team has negotiated discounts for our members. Make what you are already spending go further immediately.

Shop Across Wholesalers - Shop and compare drug prices, across multiple catalogs, build and complete orders across suppliers in one place.
